

## DRYER – Contamination Control

REGION: Europe  
MACHINE: PM7  
POSITION: 1st Single Tier  
GRADE: Linerboard & Medium (70-110 gsm)  
SPEED: 4500 FPM (1390 MPM)

 SpeedTec™

### OBJECTIVES:

---

Improve dryer fabric cleanliness and wear resistance.

### BACKGROUND:

---

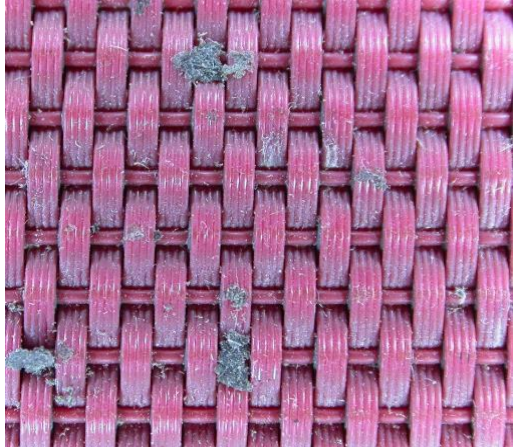

- Stickies were building up on the dryer fabric, significantly reducing perm and negatively impacting wear resistance.

### RESULTS

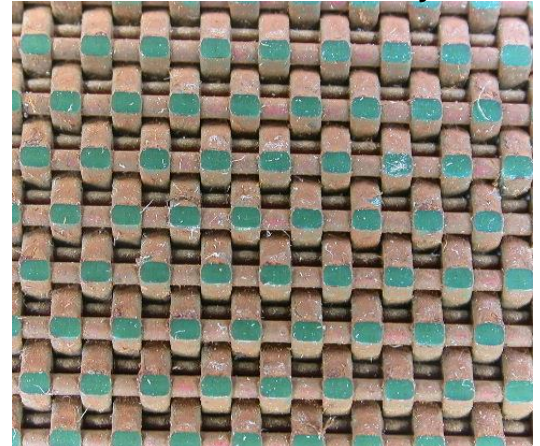

---

SpeedTec™, with its unique weave pattern with more contact points, exhibited a residual permeability of 77% after a record lifetime of 176 days.

Paper side after 176 days

Back side after 176 days
